

Huzaifa Umer

Senior iOS Developer | Swift, Xcode

developer.huzaifaumer@gmail.com | +92 3145560068 | Rawalpindi, Pakistan

[Linkedin](#) | [Github](#)

Senior iOS Developer with **10 years** of experience designing, building, and deploying production-grade iOS applications using **Swift**, **UIKit**, and **Clean Architecture**. Proven track record of contributing to high-traffic platforms, implementing scalable solutions, integrating third-party **SDKs**, and optimizing performance and security. Passionate about delivering **pixel-perfect** interfaces, **mentoring** teams, and staying current with the latest iOS trends and tools.

EXPERIENCE

Senior iOS Developer Feb 2023 -Present Armup

- **Collaborating with design, backend, and Android teams** to architect and develop the **Arm Transaction Authenticator iOS application**, ensuring secure, seamless, and scalable integration across platforms. **Contributing to the design and implementation of core authentication flows**, enabling verification of crypto withdrawal transactions initiated from the **Armup(Crypto Exchange)** and **Armdv** platforms.
- **Maintaining and enhancing the Armup iOS mobile application**, the mobile version of the Armup crypto exchange, focusing on performance, UI improvements, and secure transaction handling.
- Developing secure authentication mechanisms including **JWT-based authorization**, **biometric authentication (Face ID)**, device binding, and multi-factor verification flows.
- Developed a secure **mobile-to-mobile transaction verification feature** using **Apple Multipeer Connectivity**, enabling nearby devices to exchange and approve transaction data through encrypted peer-to-peer communication.
- Integrating real-time transaction updates and approval workflows through **push notifications**, deep linking, and backend-driven event systems.
- Implementing secure data storage using **Keychain Services**, encryption best practices, and iOS security frameworks to protect sensitive user and transaction data.
- Applying **VIPER Architecture** principles to create scalable, maintainable, and testable codebases while improving development efficiency.
- Developing reusable UI components and ensuring consistency across screens while adhering to **Apple Human Interface Guidelines**.
- Working closely with backend engineers to define API contracts, troubleshoot production issues, and improve reliability, scalability, and security of mobile transaction systems.
- Working in an **agile, cross-functional environment**, aligning mobile, backend, and design teams to streamline product flows and ensure a consistent user experience across all platforms.

Senior iOS Developer Dec 2019 - Feb 2023 Troon Technologies, Islamabad

- Partnered closely with cross-functional teams to align technical development with product objectives and user needs, driving project success.
- Worked hand-in-hand with the design team to seamlessly integrate user interface elements, ensuring an optimal and cohesive user experience across all platforms.
- **Contributed to the enhancement of the MyHealthyGut iOS application**, an evidence-based digestive health platform developed in collaboration with leading gut health experts. Focused on improving app

stability through bug fixes and code optimization, while implementing new features such as **Daily Tips** and **Reminders** to boost user engagement and retention. Collaborated with the team to ensure a smooth, intuitive user experience supporting individuals managing celiac disease, gluten intolerance, and overall gut health improvement.

- **Designed and developed the Time2Feel mobile applications natively for iOS (Swift) and Android**, built in collaboration with researchers to support Dr. Kristel Thomassin's behavioral study. Integrated the **Empatica E4 medical-grade wearable** for accurate, real-time physiological data collection, implemented **automated and deviation-based survey scheduling** to capture emotional responses based on physiological triggers, and built **custom data export pipelines** for large-scale research analysis. Delivered an intuitive,
- family-friendly user interface optimized for participants of all ages, streamlining data collection and enhancing the research experience for both participants and researchers.
- **Developed the HealthPro Solutions (HPS) iOS application in native Swift**, a unified healthcare management platform designed to streamline payroll, scheduling, and credentialing for medical professionals and facilities. Built secure and efficient modules for **automated payroll processing, provider scheduling, document and credential management**, and **real-time communication** between administrators and practitioners. Focused on delivering a seamless, intuitive user experience that enhanced operational efficiency and simplified healthcare workforce management.
- **Designed and developed the ECC (Emergency Command Center) MCBCEM mobile applications for both iOS and Android**, built to support the Missanabie Cree First Nation in improving disaster response and volunteer coordination across remote northern Ontario regions. Engineered the system for **reliable offline operation and Starlink integration**, ensuring uninterrupted communication during crises such as wildfires and floods. Collaborated closely with community leaders to map real emergency workflows into intuitive, user-friendly interfaces, enabling efficient volunteer onboarding, task management, and real-time coordination even in low-connectivity environments.

Key Projects:

1. **MyHealthyGut:**<https://apps.apple.com/us/app/myhealthygut-guided-nutrition/id1148606463>
2. **Time2Feel IOS:**<https://apps.apple.com/us/app/time2feel/id1601673329>
3. **Time2Feel Android:**<https://play.google.com/store/apps/details?id=com.app.emotion&pli=1>
4. **Health Pro Solutions:**<https://apps.apple.com/us/app/health-pro-solutions/id6743844799>
5. **MCBCEM IOS:**<https://apps.apple.com/app/mcbcem/id6503282754>
6. **MCBCEM Android:**<https://play.google.com/store/apps/details?id=com.mcblp.mcbcem>

iOS Developer March 2016 - Dec 2019 Vizteck Solutions, Islamabad

Architected and built scalable iOS frameworks for the rapid development of on-demand apps.

- **Pioneered the company's on-demand application division**, leading to a significant increase in revenue and market reach.
- **Architected and developed scalable iOS frameworks** to accelerate the creation and deployment of future on-demand service applications.
- **Built multiple production-ready iOS applications** using Swift, integrating **CoreLocation**, **Google Maps**, and **Push Notifications** for real-time user experiences.
- **Implemented real-time communication with Socket.IO**, enabling live tracking, instant status updates, and seamless user-provider interaction.
- **Integrated secure payment gateways and authentication systems**, ensuring safe transactions

and reliable user identity management.

Key Projects:

1. **Midriva:** <https://apps.apple.com/us/app/midriva/id1438867085>
2. **Midriva Driver:** <https://apps.apple.com/us/app/midriva-driver/id1439160705>
3. **MyGrocer:** <https://apps.apple.com/pk/app/mygroser/id1470372931>
4. **Boon4:** <https://apps.apple.com/pk/app/boon4/id1296128580>
5. **Eatenhunt:** <https://apps.apple.com/pk/app/eatenhunt/id1403371518>
6. **MobiMover:** <https://apps.apple.com/us/app/mobimover/id1361030831>
7. **Work2Day:** <https://apps.apple.com/us/app/work2day/id1370780039>
8. **ToolBelt Pro:** <https://apps.apple.com/pk/app/toolbelt-pro/id1420484856>

EDUCATION

Bachelor's degree in Computer Science 2012 - 2016 *Barani Institute of Information Technology, Rawalpindi*

SKILLS

Primary Skills

iOS Developer, Swift, SwiftUI, UIKit, Android and **React Native** (basic understanding for cross-platform evaluation)

Architecture & Design Pattern

MVC, MVVM, Clean Architecture, VIPER, Singleton, Delegation, Observer

Third party libraries / SDKs

Firebase(Crashlytics, Dynamic Link, Push notification), Google (Analytic, Maps), Alamofire, Twilio, SDWebImage, Socket.IO.

iOS Frameworks

CoreData, CoreLocation, Auto Layout, StoryBoards, Xib, CocoaTouch, InAppPurchases, Push Notification, Programmatic UI, RESTful API Integration, Mock testing, WebViews, Apple Multipeer Connectivity, Multi-threading, App Lifecycle Management and CI/CD.

Tools

Xcode, Android Studio, TestFlight, Xcode Cloud, CocoaPods, Git Version Control(GitHub, BitBucket, Sourcetree, GitLab), Jira, Slack, Trello.
